Eighth graders explore careers with Pathways2Possibilities

Future careers come into focus for students at inaugural expo

Hundreds of 8th grade students across the district were able to participate in a hands-on exploration of 17 career pathways with 32 exhibitors during the Pathways2Possibilities: P2P Career Expo this week at the Jackson Fairgrounds. Professionals from local government, utilities, manufacturing, finance, healthcare,

construction, and industry led several exciting demonstrations. The students were able to step in, participate, and ask questions. The P2P Expo allowed many of our students to take the first steps in planning their futures. Please visit www.jmcss.org/innovation to read the event booklet with the list of sponsors!

From the Superintendent's Desk

JMCSS is now accepting applications for current 6th and 7th-grade students to attend classes at the Malesus STEM Innovation Center starting August 2024. Visit www.jmcss.org/malesusstem for full details! #Winning

The Super Challenge

If the reciprocal of x^3 is 27, what is the value of x ?

1/17 answer: $= 11 \times 11 \times 11 = 1331$

WOW: Word of the Week

Axiomatic: clear or obvious
