

JACKSON-MADISON COUNTY SCHOOL SYSTEM

Girls lead Technology club efforts at North Side High

Aiming to break barriers in computer science, engineering

Members of North Side's **Technology Student Association** prepared diligently and competed well in the TSA state conference and competition in Chattanooga. While participating in **leadership training, debate, robotics and technology bowl challenge prep**, these

young people aim to change the future. While women fill many science-related health care jobs, they continue to be underrepresented in computer science and engineering. Clubs like TSA help expose students to careers in STEM. Now that's **#WINNING #CHOOSEUS**

From the Superintendent's Desk

K-7th grade students are encouraged to take advantage of our Summer Bridge Learning Camps. These camps will focus on reading, math, physical activity, and fun! Lunch and transportation will be provided. Visit jmcss.org for more info and to register.

The Super Challenge

Calculate the Geometric Mean of 4, 5 and 6.25
4/14 answer: x17

WOW: Word of the Week

Ambulate: step or walk
